Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Response to Amendment

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

Claims 35-47 are rejected under 35 U.S.C. 102(e) as being anticipated by Hovda et al (US 6,264,650). Hovda discloses a device (figs. 7B, 8A, and 8C) having a shaft 100, a control structure 28 operably connected to the shaft by means of 34, at least one injury effector 104, and at least one therapeutic-substance delivery effector 112 or the plurality of fluid lumens around the perimeter of shaft 100 at the distal end of the shaft. The Examiner is also referring to element (104) as the at least one marking effector and makes reference to the paragraph (0048) of the Applicant's specification, in which the Applicant discloses that the marking of the tissue may be a side result of the first treatment with the injury effector. It is the Examiner's position that the electrodes (104) will ablate and cauterize tissue enough to leave a visible marker. It would also be obvious to one of ordinary skill in the art to include radiopaque or MRI markers to the device to ensure proper placement in the body.

Response to Arguments

Applicant's arguments filed 12/18/2006 have been fully considered but they are not persuasive. In response to the Applicant's argument that Hovda does not disclose a marking effector, the Examiner respectfully disagrees. Please see explanation above.

Conclusion

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Theodore J. Stigell whose telephone number is 571-272-8759. The examiner can normally be reached on M-F 8:30-5:00.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Nicholas Lucchesi can be reached on 571-272-4977. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.
